INDIVIDUAL REPORT TASK

**COURSE : VALUE AND
SELF-ESTEEM**

NAME. : DAMIYA AINA BINTI BASIR ABD SHAMMAD

MATRIC NO : A23CS0220

LECTURER NAME : DR MOHD RIZALUDIN BIN MAHMOOD

DATELINE : 17 OCTOBER 2023

Background of situation

* not a real name *

En Amin is a highschool teacher. He teaches a history subject and he really close to his students. Everytime the examination is around the corner, the students will be exposed to a lot of tips and answer techniques. They also will be given a lot of exercises and practices. Basically, the teachers will give the Past year Questions to their students. But, En Amin always give the leaked questions to his student as the easiest way so that the student do not feel to carry some burden on themselves. He always share the questions ^{neither} through chat group with his students nor in the class on the spot. As a result, En Amin can achieve his teaching objectives to make all of his students pass his subject with flying colours without even try to put some efforts.

Justification

In my opinion, the action of En Amin is not reasonable at all. It is because he is violating the work ethics and it can bring a lot of negative effects to his students' study. I also think that En Amin has misuse the technology by using the group chat to send all of the leaked questions because instead of doing this, the students can use this platform to ask every parts that they do not understand and learn from it. This wrongdoing also is one of the example of someone is losing their Integrity in doing his/her job and it should be prevent from getting worse.

Lost Self - Esteem Values

① Lack of study

→ the students will feel very lazy to study more about the topic in the examination. They only prepare for the leaked topic shared by the teacher to ease themselves.

② Lack of Improvement

→ The students think they don't have to meet the teacher to ask anything that they don't understand about the subject. They will feel like they don't need to improve anything because they already have the leaked question that can help them answer and score in examination.

8

③ Lost of integrity

→ the teacher will always apply this culture if it not prevented as their easiest way to pass all of their students but at the same time their own working quality has been worsen day by day everytime examination is held.

universal values

① Hardworking

→ The person involved in such situation which is the student need to be a hardworking person. This value could give a lot of benefit to themselves because a hardworking person in his/her study life can lead them to big success. They also can improve their knowledge if they have this value to ask ~~what~~ the topic that they don't understand to the teacher.

② Sincerity

→ En Amin or the teacher should know and understand the job ethique especially when it comes to the students because they are the one that seek the knowledge and get to learn thing firstly from the teachers. It is also because the teachers are the one who give a lot of knowledge about everything such as history of the world, mathematics, science and also language subject. Teacher need to be sincere with their job because they created humanity in youngster so the issue such leaking the question paper or exam topic can be prevented.

Brainstorming the solutions

① Teacher Self-Motivation Campaign

→ this campaign can be held as the effective way to bring more awareness to a lot of teachers about the job etiquettes and how to handle it well.

→ This can be done through a talk by professionals, a poster visualization and also by online where they can talk and join to share the problem and solve it together.

② Class Improvement

→ when the teacher have these awareness, they can start to improve the class environment as in the past, they only focus on remembering and answering the Past Year Question oftenly as usual.

→ Now, teachers can change and create a new fun environment and method to give more interesting visualization about the topic in examination instead of ~~on~~ only remembering. This way will create a fun and happy vibes to the student when they study about the exam topic.

③ student awareness

→ The school management can bring the professionals that can give a talk to them to give more motivation about the importance of study hard and smart and not to gain something so easily and must be a hardworking person if they want to be success in study and life. It is because by study the leaked question only, they would understand about half of the topic of the subject only.

Conclusion

To sum up, the positive value and high self-esteem is really important for all of people because it can build someone's good character and identity. The wrongdoing should be fix and improved into a better version and try to learn from the mistake that we created. Sometimes, value can help a lot of people and can destroy them too. Thus, positive value need to be in every person's character and try to apply it in our life. High self esteem can encourage us to be more brave and speak up what is unspeak to the world. It can bring a lot of awareness to the people so that they can learn it together. As a result, all of the issue regarding ^{to} the lost of integrity, value and low self-esteem can be prevented.

Reflection

from that situation, I realised that being a hardworking person is really important and can play a huge role because it will make you determine in doing something you want. For example, in study, we need to be hardworking so that the laziness can be avoid and we can understand a lot about the subject ^{that} we learn. Next, sincerity is also important in doing something because without sincerity, everything will go wrong and it will affect people ^{around} ~~on~~ your surrounding. I also think that with sincerity, it can make us enjoy the thing that we do.
